

A YEAR
WITH
levva

SUMMER 2020, 2021

levva is a reusable menstrual cup placed into the vagina and collects menstrual fluid rather than absorbing it. levva is made of medical and biocompatible silicone; it helps maintain a healthy vaginal pH level and natural flora during the cycle and does not cause dryness, irritation, sensitivity, or infection. levva is designed to be the most comfortable, hygienic, healthy, and eco-friendly menstrual hygiene product.

A background image showing two hands holding two menstrual cups, one pink and one light blue, against a light pink background with white geometric lines.

At Levva Pharma, we try to change how menstruation affects our lives, bodies, and environment.

We believe:

- women shouldn't be held back from normal life because of their periods and their bodies ' natural cycle.
- Women should never have a sense of embarrassment because of their periods.
- We also do not forget that we are responsible for the environment and the future; we want to give the mother of the earth a chance to breathe.

Read what happened in this year, at levva

A hand is shown holding a blue, bell-shaped menstrual cup. The cup has a small stem at the bottom. The background is white. In the top left corner, there is a red crosshair. In the bottom right corner, there is a red crosshair.

56000 periods with
levva

56000 pad and
tampon free
period

1.680.000 fewer
pieces of trash in
the landfill

less carbon
impact, saving
32600 kgCO₂e

94%

Of levva cup users will
recommend it to others*
